PARTNERSHIP

Student Partner Tutorial

Students on the ground. Trucks in the network.

Apex Partnership is Apex Transport Group's student-driven lead generation program. Student partners across SADC campuses make cold calls and site visits to transport companies, identify verified truck owners, and submit them through a WhatsApp bot for review — earning real commission for every truck that gets loaded.

Own Trucks Only We work directly with transport companies that operate their own fleet — not brokers, not agents.	Student-Led Campus partners cold call and visit companies with trucks, using their own local networks.	Commission-Based Every truck successfully loaded from a verified lead pays out — tracked transparently via WhatsApp.

— Who We're Looking For

Companies that own and operate their own trucks — not freight brokers, not transport middlemen. If the business has trucks on the road, it qualifies as a lead. This is the single most important rule of the program: student partners are finding fleet owners, not agents reselling capacity.

Not brokers. Owners.

A lead only counts if the company physically owns the trucks it operates. Brokerage businesses, freight forwarders, and load-matching agents are not valid leads under this program.

From cold call to commission

The path from a student partner's first conversation with a transporter to a paid commission runs through four simple stages. Everything after the initial approach is tracked and verified through the APEX WhatsApp bot.

1

Find & Approach

Cold call or visit a company that owns trucks. Confirm they operate their own fleet — not a brokerage — and get the fleet manager's name and number.

2

Submit via WhatsApp

Message the APEX bot and walk through the lead wizard: fleet owner's phone number, company name, truck count, and truck type.

3

APEX Verifies

Apex staff review and verify the transporter is legitimate. You can track progress any time by sending STATUS.

4

Trucks Load, You Get Paid

Once trucks are loaded on a job, commission is calculated and paid directly to your bank account — R1,000 per truck.

— Commission Structure

Commission is paid per truck, once a lead has been verified, loaded, and confirmed. There is no cap — the more verified fleet owners you bring in, the more you earn.

Everything runs through WhatsApp

Student partners never need a separate app or portal. The entire process — onboarding, training, lead submission, and status tracking — happens inside a WhatsApp conversation with the APEX bot.

Command	What it does
TUTORIAL	Sends the PDF guide
READY	Starts the practice test
LEAD / SUBMIT LEAD / /LEAD	Starts the lead submission wizard
STATUS / /STATUS	Shows your lead pipeline

Getting Started

- Send TUTORIAL to receive the training PDF.
- Send READY when you're set to take the short practice test.
- Pass the practice test (3 attempts) to unlock ACTIVE status.
- Once ACTIVE, send LEAD any time to submit a real transporter.

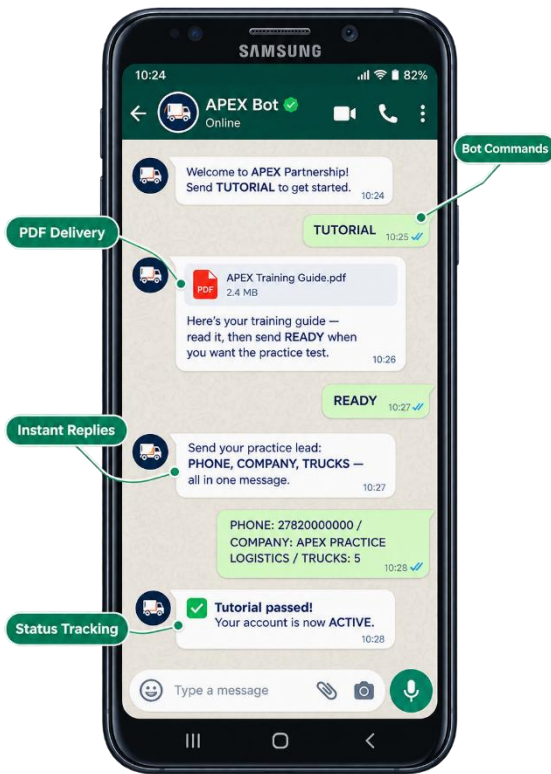

Figure 3 — WhatsApp bot conversation (placeholder)

Four fields, one qualified transporter

Once your account is ACTIVE, the bot walks you through four short steps for every lead. Each is asked separately — don't try to combine them.

- 1

Fleet Owner Phone
The cellphone number of the fleet owner or manager, with country code (e.g. 27821234567). Must be 10–15 digits and cannot already exist in the system.
- 2

Company Name
The full legal or trading name of the transport company (max 255 characters).
- 3

Truck Count
How many trucks the transporter operates — a whole number between 1 and 10,000.
- 4

Truck Type
Superlink, Lowbed, or Mixed fleet — selected by button or typed name/number.

No duplicates, no edits

Each fleet owner's phone number can only exist once in the APEX system. Once a lead is submitted, it cannot be edited — double-check details before you send.

— **Tracking Your Pipeline**

Send STATUS at any time to see exactly where every lead you've submitted stands.

Status	What it means
Under Review	Lead submitted — APEX staff are vetting the transporter.
Verified (Awaiting Load)	Transporter confirmed legitimate, waiting to be loaded.
Truck Loaded (Commission Pending)	Trucks loaded — commission calculation in progress.
Commission Paid!	R1,000 per truck has been paid to your bank account.

Keep it clean, keep it fast

- One phone number per account — your WhatsApp number is permanently linked to your student profile.
- No duplicate leads — a fleet owner's number must be unique across the whole APEX network.
- No spam — a maximum of 10 messages per minute is enforced by the bot.
- No fake leads — fraudulent submissions result in a permanent ban from the program.
- No editing after submission — leads are locked once sent, so confirm details first.

— Troubleshooting

Problem	Fix
Phone number rejected	That transporter is already in the network — try a different one.
Account on ADMIN_HOLD	You failed all 3 practice attempts. Wait for APEX staff to reactivate you.
No response after submitting	Send STATUS to check — processing can take a little time.
Didn't get a paid alert	Send STATUS and look for Commission Paid! next to that lead.

NEED HELP?

Reply to any APEX bot message with your question — staff respond during business hours.
For urgent issues, contact your campus APEX coordinator.
